

Phytolith database worksheet

Institute of Archaeology, University College London

Emma Harvey, Dorian Fuller

Aim of the worksheet:

The worksheet has been designed to help us assess whether the database is useful to you as researchers and students. Please work through the questions below using the database to do searches and send the results back to us.

Question 1:

Can you use the database to determine the morphotypes present in *Triticum monococcum*?

Question 2:

What plant types have scooped bilobes?

Question 3:

Try to identify this archaeological phytolith using the database

Question 4:

Try to identify this archaeological phytolith using the database

Evaluation of the database

Please make some comments on the database.

Was it easy to use?

Did the programme work easily on your computer?

Were there enough categories to search by?

Have you got any suggestions on how to improve the database?

Any other comments?
