

# Contents

Preface	xi
Dependence of Chapters	xvi
Answers and Solutions	xvii
The Greek Alphabet	xviii
<b>1 LINEAR EQUATIONS</b>	<b>1</b>
1.1 Straight line graphs . . . . .	1
1.2 An economic application: supply and demand . . . . .	8
1.3 Simultaneous equations . . . . .	11
1.4 Input-output analysis . . . . .	17
Problems on Chapter 1 . . . . .	19
<b>2 LINEAR INEQUALITIES</b>	<b>21</b>
2.1 Inequalities . . . . .	21
2.2 Economic applications . . . . .	25
2.3 Linear programming . . . . .	29
Problems on Chapter 2 . . . . .	34
<b>3 SETS AND FUNCTIONS</b>	<b>36</b>
3.1 Sets . . . . .	36
3.2 Real numbers . . . . .	40
3.3 Functions . . . . .	46
3.4 Mappings . . . . .	54
Problems on Chapter 3 . . . . .	56
<b>4 QUADRATICS, INDICES AND LOGARITHMS</b>	<b>58</b>
4.1 Quadratic functions and equations . . . . .	58
4.2 Maximising and minimising quadratic functions . . . . .	65
4.3 Indices . . . . .	67
4.4 Logarithms . . . . .	73
Problems on Chapter 4 . . . . .	76

<b>5 SEQUENCES, SERIES AND LIMITS</b>	<b>78</b>
5.1 Sequences . . . . .	78
5.2 Series . . . . .	83
5.3 Geometric progressions in economics . . . . .	87
5.4 Limits and continuity . . . . .	92
Problems on Chapter 5 . . . . .	98
<b>6 INTRODUCTION TO DIFFERENTIATION</b>	<b>100</b>
6.1 The derivative . . . . .	101
6.2 Linear approximations and differentiability . . . . .	108
6.3 Two useful rules . . . . .	112
6.4 Derivatives in economics . . . . .	115
Problems on Chapter 6 . . . . .	117
<b>7 METHODS OF DIFFERENTIATION</b>	<b>119</b>
7.1 The product and quotient rules . . . . .	119
7.2 The composite function rule . . . . .	121
7.3 Monotonic functions . . . . .	125
7.4 Inverse functions . . . . .	131
Problems on Chapter 7 . . . . .	134
Appendix to Chapter 7 . . . . .	136
<b>8 MAXIMA AND MINIMA</b>	<b>137</b>
8.1 Critical points . . . . .	137
8.2 The second derivative . . . . .	141
8.3 Optimisation . . . . .	145
8.4 Convexity and concavity . . . . .	153
Problems on Chapter 8 . . . . .	161
<b>9 EXPONENTIAL AND LOGARITHMIC FUNCTIONS</b>	<b>163</b>
9.1 The exponential function . . . . .	163
9.2 Natural logarithms . . . . .	168
9.3 Time in economics . . . . .	174
Problems on Chapter 9 . . . . .	177
Appendix to Chapter 9 . . . . .	179
<b>10 APPROXIMATIONS</b>	<b>181</b>
10.1 Linear approximations and Newton's method . . . . .	182
10.2 The mean value theorem . . . . .	185
10.3 Quadratic approximations and Taylor's theorem . . . . .	189
10.4 Taylor and Maclaurin series . . . . .	193
Problems on Chapter 10 . . . . .	196
Appendix to Chapter 10 . . . . .	198

<b>11 MATRIX ALGEBRA</b>	<b>201</b>
11.1 Vectors . . . . .	201
11.2 Matrices . . . . .	207
11.3 Matrix multiplication . . . . .	213
11.4 Square matrices . . . . .	217
Problems on Chapter 11 . . . . .	219
<b>12 SYSTEMS OF LINEAR EQUATIONS</b>	<b>221</b>
12.1 Echelon matrices . . . . .	221
12.2 More on Gaussian elimination . . . . .	225
12.3 Inverting a matrix . . . . .	231
12.4 Linear dependence and rank . . . . .	237
Problems on Chapter 12 . . . . .	240
<b>13 DETERMINANTS AND QUADRATIC FORMS</b>	<b>242</b>
13.1 Determinants . . . . .	243
13.2 Transposition . . . . .	249
13.3 Inner products . . . . .	252
13.4 Quadratic forms and symmetric matrices . . . . .	256
Problems on Chapter 13 . . . . .	263
Appendix to Chapter 13 . . . . .	266
<b>14 FUNCTIONS OF SEVERAL VARIABLES</b>	<b>267</b>
14.1 Partial derivatives . . . . .	268
14.2 Approximations and the chain rule . . . . .	274
14.3 An economic application: production functions . . . . .	280
14.4 Homogeneous functions . . . . .	283
Problems on Chapter 14 . . . . .	288
Appendix to Chapter 14 . . . . .	290
<b>15 IMPLICIT RELATIONS</b>	<b>293</b>
15.1 Implicit differentiation . . . . .	293
15.2 Comparative statics . . . . .	301
15.3 Generalising to higher dimensions . . . . .	306
Problems on Chapter 15 . . . . .	311
Appendix to Chapter 15 . . . . .	313
<b>16 OPTIMISATION WITH SEVERAL VARIABLES</b>	<b>315</b>
16.1 Critical points and their classification . . . . .	315
16.2 Global optima, concavity and convexity . . . . .	323
16.3 Non-negativity constraints . . . . .	331
Problems on Chapter 16 . . . . .	334
Appendix to Chapter 16 . . . . .	336

<b>17 PRINCIPLES OF CONSTRAINED OPTIMISATION</b>	<b>339</b>
17.1 Lagrange multipliers . . . . .	339
17.2 Extensions and warnings . . . . .	346
17.3 Economic applications . . . . .	350
17.4 Quasi-concave functions . . . . .	359
Problems on Chapter 17 . . . . .	365
<b>18 FURTHER TOPICS IN CONSTRAINED OPTIMISATION</b>	<b>368</b>
18.1 The meaning of the multipliers . . . . .	369
18.2 Envelope theorems . . . . .	372
18.3 Non-negativity constraints again . . . . .	379
18.4 Inequality constraints . . . . .	383
Problems on Chapter 18 . . . . .	390
<b>19 INTEGRATION</b>	<b>393</b>
19.1 Areas and integrals . . . . .	393
19.2 Rules of integration . . . . .	400
19.3 Integration in economics . . . . .	406
19.4 Numerical integration . . . . .	409
Problems on Chapter 19 . . . . .	416
Appendix to Chapter 19 . . . . .	418
<b>20 ASPECTS OF INTEGRAL CALCULUS</b>	<b>420</b>
20.1 Methods of integration . . . . .	420
20.2 Infinite integrals . . . . .	426
20.3 Differentiation under the integral sign . . . . .	430
20.4 Double integrals . . . . .	434
Problems on Chapter 20 . . . . .	442
<b>21 PROBABILITY</b>	<b>444</b>
21.1 Events and their probabilities . . . . .	444
21.2 Conditional probability and independence . . . . .	450
21.3 Random variables . . . . .	457
21.4 The binomial, Poisson and exponential distributions . . . . .	464
Problems on Chapter 21 . . . . .	467
Appendix to Chapter 21 . . . . .	469
<b>22 EXPECTATION</b>	<b>471</b>
22.1 Expected value . . . . .	471
22.2 The variance and higher moments . . . . .	476
22.3 Two or more random variables . . . . .	482
22.4 Random samples and limit theorems . . . . .	492
Problems on Chapter 22 . . . . .	498
Appendix to Chapter 22 . . . . .	500

<b>23 INTRODUCTION TO DYNAMICS</b>	<b>502</b>
23.1 Differential equations . . . . .	502
23.2 Linear equations with constant coefficients . . . . .	507
23.3 Harder first-order equations . . . . .	513
23.4 Difference equations . . . . .	519
Problems on Chapter 23 . . . . .	526
<b>24 THE CIRCULAR FUNCTIONS</b>	<b>529</b>
24.1 Cycles, circles and trigonometry . . . . .	529
24.2 Extending the definitions . . . . .	535
24.3 Calculus with circular functions . . . . .	542
24.4 Polar coordinates . . . . .	548
Problems on Chapter 24 . . . . .	551
<b>25 COMPLEX NUMBERS</b>	<b>553</b>
25.1 The complex number system . . . . .	553
25.2 The trigonometric form . . . . .	558
25.3 Complex exponentials and polynomials . . . . .	562
Problems on Chapter 25 . . . . .	568
<b>26 FURTHER DYNAMICS</b>	<b>569</b>
26.1 Second-order differential equations . . . . .	569
26.2 Qualitative behaviour . . . . .	578
26.3 Second-order difference equations . . . . .	585
Problems on Chapter 26 . . . . .	593
Appendix to Chapter 26 . . . . .	595
<b>27 EIGENVALUES AND EIGENVECTORS</b>	<b>597</b>
27.1 Diagonalisable matrices . . . . .	597
27.2 The characteristic polynomial . . . . .	603
27.3 Eigenvalues of symmetric matrices . . . . .	610
Problems on Chapter 27 . . . . .	614
<b>28 DYNAMIC SYSTEMS</b>	<b>616</b>
28.1 Systems of difference equations . . . . .	616
28.2 Systems of differential equations . . . . .	624
28.3 Qualitative behaviour . . . . .	629
28.4 Non-linear systems . . . . .	641
Problems on Chapter 28 . . . . .	648
Appendix to Chapter 28 . . . . .	650
<b>29 DYNAMIC OPTIMISATION IN DISCRETE TIME</b>	<b>651</b>
29.1 The basic problem . . . . .	651
29.2 Variants of the basic problem . . . . .	657
29.3 Dynamic programming . . . . .	660

Problems on Chapter 29 . . . . .	667
Appendix to Chapter 29 . . . . .	669
<b>30 DYNAMIC OPTIMISATION IN CONTINUOUS TIME</b>	<b>671</b>
30.1 The basic problem and its variants . . . . .	671
30.2 The maximum principle . . . . .	676
30.3 Two applications to resource economics . . . . .	681
30.4 Problems with an infinite horizon . . . . .	688
Problems on Chapter 30 . . . . .	691
Appendix to Chapter 30 . . . . .	695
<b>31 INTRODUCTION TO ANALYSIS</b>	<b>700</b>
31.1 Rigour . . . . .	700
31.2 More on the real number system . . . . .	704
31.3 Sequences of real numbers . . . . .	708
31.4 More on limits and continuity . . . . .	713
Problems on Chapter 31 . . . . .	716
<b>32 METRIC SPACES AND EXISTENCE THEOREMS</b>	<b>719</b>
32.1 Metric spaces . . . . .	720
32.2 Open, closed and compact sets . . . . .	725
32.3 Continuous mappings . . . . .	730
32.4 Fixed point theorems . . . . .	734
Problems on Chapter 32 . . . . .	739
Appendix to Chapter 32 . . . . .	741
<b>Notes on Further Reading</b>	<b>745</b>
<b>Index</b>	<b>747</b>
