Corrigendum

Corrigendum to “Partition sums for molecules and their isotopologues for HITRAN2024” [Journal of Quantitative Spectroscopy & Radiative Transfer 345 (2025) 109568]

The authors regret that in the determination of the partition sums for $^{16}\text{O}^{14}\text{N}^{18}\text{O}$, a python code building a dictionary of the term values from Marinina *et al.* [JQSRT 2022; 290: 108312] neglected the symmetry designations in the quantum numbers (+ or –) leading to half the term values not being used. We thank Dr. Valery Perevalov for pointing this

out to us. The partitions sums were corrected and new versions of the codes, TIPS2024_v1p1.FOR and TIPS2024_v1p1.py, are available at ZENODO (10.5281/zenodo.16411169).

The authors would like to apologise for any inconvenience caused.
